

Cut-Mark – Your complete resource for machining, screw machining, stamping, sheet metal fabrication, design and engineering

CNC MACHINING

- Up to 4-Axis CNC Machining
- Vertical and horizontal CNC Machining centers with pallet changers
- CNC Lathes with bar feeder capability up to 2”

Sheet Metal Fabrication

- CNC Turret punch presses
- CNC Controlled press brakes
- Metal stamping
- CNC water jet
- CNC laser cutting
- Welding MIG & TIG on steel, stainless steel and aluminum
- Deburring and graining

Screw Machining

- CNC Swiss with 7-Axis capability
- CNC Gang slide with bar feeder up to 1 5/8” diameter
- Brown & Sharpe Automatic Screw Machines up to 2” diameter

Metal Stampings

- Progressive and four slide capabilities. Quantities as low as 250 pieces

Custom Springs

- Compression, extension, torsion spring and wire forms

Wire Harness & Cable assemblies

Additional Manufacturing Processes

- Assembly, Engineering, Engraving, Heat Treatment, Metal Finishing, Silk Screen

Engineering Services

- We can work closely with your Engineering Department to help develop or improve any new or existing design, etc. Also, we have capabilities to reverse engineer anything as well and supply you with SolidWorks 3D drawings, prototypes and complete assemblies.

Cut-Mark's unique capabilities can deliver a single prototype or a full production run. Our reputation spans over 30 years of quality, service and competitive pricing.

Our mandate is customer satisfaction!

We are The Can-Do Supplier and we look forward to quoting your requirements.
